

TABULUS

The Table Oriented Worksheet

FOR IMMEDIATE RELEASE

Diehl Technology LLC Announces the Open Beta of TABULUS

Columbia, Maryland (July 15, 2009)—Diehl Technology LLC today announced the open beta of TABULUS, The Table Oriented Worksheet for Microsoft Windows.

The FREE Beta download can be found at www.tabulus.com

Richard Diehl, the inventor of one of the world's best selling CAD product, Vectorworks, has done it again. Mr. Diehl is proud to announce his newest software invention TABULUS and its open beta release.

The new groundbreaking design will revolutionize the process in which people work with financial and business data.

TABULUS, the table oriented worksheet, is a business modeling software program that provides customers with a superior method for entering or importing data, performing analysis, viewing of business, marketing, and sales data right on their desktop. TABULUS combines the flexibility of a spreadsheet, structure of a database, modeling of financial software, and presentation ability of a reporting program, all with a state of the art intuitive graphical user interface.

Why is table oriented TABULUS better than the cell oriented spreadsheet you're using today?

Spreadsheets are the most valuable piece of business software in your arsenal because of their enormous flexibility and ease of use. When trying to manage financial data such as P&L's, budgets, forecasts, sales reports, etc., spreadsheets can become error-prone and difficult to manipulate. TABULUS changes all of that with tables which can easily be dragged around and placed where needed within the file and can be worked with separately or together. To eliminate errors caused by broken links or formulas there is only one instance of each piece of data. The same data can be used in multiple reports.

Behind the scenes, Diehl Technology LLC has been working with an international team of engineers over the past 3 years to design and development the groundbreaking technology which will bring ease to a market where reports are required and scrutinized more than ever.

“As a CEO I have dealt with spreadsheet reporting issues for years, and finally we have done something about it. I am very proud to put my name and reputation behind TABULUS.” says Richard Diehl, CEO and Owner of Diehl Technology LLC.
