Diehl Technology LLC Announces the Open Beta of TABULUS

Columbia, Maryland (October 7, 2009)—Diehl Technology LLC today announced the TABULUS 2010 B3 FREE Open Beta. TABULUS, The Table Oriented Spreadsheet for Microsoft Windows. The FREE Beta download can be found under the “Free Beta” menu www.tabulus.com

“Simply put, TABULUS is a better spreadsheet”

Richard Diehl, the inventor of one of the world’s best selling CAD products, Vectorworks, has done it again. Mr. Diehl is proud to announce his newest software invention TABULUS 2010 B3 release.

The new groundbreaking spreadsheet design software will revolutionize the process in which people work with financial and business data. *“Simply put, TABULUS is a better spreadsheet”* says Richard Diehl, Founder and CEO of Diehl Technology LLC.

With spreadsheet and business modeling capabilities TABULUS provides customers with a superior method for entering or importing data, performing analysis, viewing of business, marketing, and sales data right on their desktop. TABULUS combines the flexibility of a spreadsheet, structure of a database, modeling of financial software, and presentation ability of a reporting program, all with a state of the art intuitive graphical user interface.

The latest version 2010 B3 addresses the user input formula editor, and formula syntax improvements, along with the completion of the paste special function. Using feedback from beta users the development team has been able to add hundreds of user interface enhancements. The parameter list for sumif, and countif functions was simplified. Account group simplification, export of xls, and xlsx file formats along with a new training video dialog were all put in place to improve on the user experience and functionality of TABULUS. Additional user input improvements were made along with speed optimization, and general maintenance fixes. A pdf version of the user manual is posted under support www.tabulus.com.

Behind the scenes, Diehl Technology LLC has been working with an international development team of engineers over the past 3 years to design and develop the groundbreaking technology which will bring ease to a market where reports are required and scrutinized more than ever.
